BI NORWEGIAN BUSINESS SCHOOL

Multiple-choice exam:	EXC 29531	Organizational Behaviour and Management		
Examination date:	04 Dec, 2015	09:00-10:00	Total no. of pages:	14 incl. attachments
			No. of attachments:	1
Permitted examination support material:	Bilingual dictionary			
Answer sheets:	Answer sheet for multiple-choice examinations			
	Counts 100 % of EXC 29531		Responsible department: Leadership and Organizational Behaviour	

PLEASE READ THE FOLLOWING BEFORE YOU BEGIN!

- Students must themselves assure that the examination papers are complete.

- Students must provide the following information on the answer sheet:
  - ✓ **Examination code**
  - ✓ **Personal initials**
  - ✓ **ID-nr**

  The ID-nr must be recorded with both the appropriate numbers and by putting an "X" by the corresponding number in the columns below.

- Do not use pencils or pens with green ink when filling in answer sheets. Answer sheets must not be used for rough drafts.

- **All answers must be recorded with an "X" under the letter you believe corresponds with the correct answer.**

- **Cancel an "X" by filling in the box completely (boxes that are completely filled in will not be registered). "X" in two boxes for one question will be registered as a wrong answer.**

- The attached example shows you how the answer sheet would be filled in if A were the correct answer for question 1, B correct for question 2, C correct for question 3 and D correct for question 4. An "X" under E indicates that you choose not to answer question 5.

- **Your answers are to be recorded on the answer sheet. Answers written on the examination papers and not on the answer sheets will not be graded.**

- There is only <u>one</u> right answer for each question. Because the questions are weighted equally, it can be to your advantage to answer the easiest questions first.

- Wrong answers are given -1 point, unanswered questions get 0 points (indicated by an "X" next to E") and correct answers are given 3 points.

- You can keep the examination papers.

1 The individual performance equation comprises:

A individual attributes, organizational support and work effort
B work effort, personal goals and organizational support
C individual attributes, organizational support and personal goals
D personal goals, work effort and individual attributes
E I do not want to answer this question

2 Work effort is best described as:

A willingness to turn up to work
B willingness to work long hours
C willingness to perform
D motivation to work
E I do not want to answer this question

3 A person's perceptual set is:

A when one attribute of a person or situation is used to develop an overall impression
B the assignment of one’s own personal attributes to other individuals
C the tendency to find in another situation or person that which you expected to find
D a person’s past experiences, personality and values influencing their perception
E I do not want to answer this question

4 Projection is:

A the assignment of one’s own personal attributes to other individuals
B the tendency to find in another situation or person that which you expected to find
C when one attribute of a person or situation is used to develop an overall impression
D assigning an individual to a group or category and judging the person accordingly
E I do not want to answer this question

5 A halo effect occurs when:

A an individual is assigned to a group or category and judged accordingly
B one attribute of a person or situation is used to develop an overall impression
C one assigns one’s own personal attributes to another individual
D an individual overestimates the influence of personal factors on other people's behaviour
E I do not want to answer this question

6 The fundamental attribution error occurs when:

A we overestimate the influence of personal factors on the behaviour of others
B we assign an individual to a group of category and judge them accordingly
C we assign our own personal attributes to another individual
D we behave in ways that will create and maintain desired impressions
E I do not want to answer this question

7 Impression management is:

A the assignment of an individual to a group or category and judging them accordingly
B the assignment of our own personal attributes to another individual
C an attempt to behave in ways that will create and maintain desired impressions
D an overestimation of the influence of personal factors on other people's behaviour
E I do not want to answer this question

8 The 'rusty halo' effect involves:

A one attribute of a person or situation leading to a negative overall impression
B one attribute of a person or situation leading to a positive overall impression
C the tendency to find in another situation or person that which you expected to find
D the assignment of an individual to a group or category and judging them accordingly
E I do not want to answer this question

9 Which of the following is **not** included as a major factor contributing to perceptual differences?

A characteristics of perceiver
B characteristics of the perceived
C situation
D motivation
E I do not want to answer this question

10 Stereotyping is:

A assigning an individual to a group or a category and judging the person accordingly
B overestimating capabilities of a group
C underestimating capabilities of a group
D treating every individual the same way
E I do not want to answer this question

11 The use of stereotyping for judging people results in:

A correct evaluation of differences between individuals
B correctly identifying characteristics of a group
C accurate prediction of job performance
D inaccurate assessment of an individual's performance potential
E I do not want to answer this question

12 Internals are_____ than externals.

A more alienated
B more rootless
C better at learning and problem solving tasks
D more dependent
E I do not want to answer this question

13 Externals are_____ than internals.

A less dogmatic
B less authoritarian
C less Machiavellian
D less reliant on their judgement
E I do not want to answer this question

14 The nomothetic view of personality:

A believes that an individual's personality emerges and develops with experience
B seeks to identify the ways in which an individual's personality varies from others
C gives stress to an individual's childhood experience in determining personality
D believes that we behave in ways that create and maintain desired impressions
E I do not want to answer this question

15 Which of the following is **not** one of the 'Big 5' personality dimensions?

A extroversion-introversion
B agreeableness-hostility
C halo-rusty halo
D open to experience-closed to experience
E I do not want to answer this question

16 Dogmatic superiors tend to:

A reject authority
B accept subordinates based on how much the subordinates agree with accepted authority
C alternate between being rigid and flexible
D use a flexible approach as managers
E I do not want to answer this question

17 Mark the correct definition of empowerment below.

A the ways in which a person goes about gathering and evaluating information
B a person's emphasis on authority
C the process by which managers delegate power to employees
D the process by which managers centralize power in organizations
E I do not want to answer this question

18 'The Prince' is the basis of a personality dimension called:

A dogmatism
B machiavellianism
C authoritarianism
D extroversion
E I do not want to answer this question

19 The idiographic approach to personality:

A believes that an individual's personality emerges and develops with experience
B believes that one should do whatever it takes to get our own way
C seeks to identify the ways in which an individual's personality varies from others
D believes that extroversion-introversion is the most important personality dimension
E I do not want to answer this question

20 Which of the following is **not** an advantage of employing a diverse workforce?

A diverse perspectives bring creativity and innovation
B where there is a shortage of skilled labour, diversity has recruitment benefits
C problems are solved using a wide range of ideas and perspectives
D in diverse workforces individual are stereotyped
E I do not want to answer this question

21 Value congruence occurs when:

A individuals express positive feelings on encountering others with similar values
B individuals express negative feelings on encountering others with similar values
C an individual experiences a state of inconsistency between their values and behaviour
D an individual changes their future behaviour to align with their values
E I do not want to answer this question

22 Cognitive dissonance occurs when:

A an individual experiences a feeling of dissatisfaction with their work
B an individual experiences a feeling of dissatisfaction with their employer
C there is a state of consistency between an individual's attitudes and behaviour
D there is a state of inconsistency between an individual's attitudes and behaviour
E I do not want to answer this question

23 Which of these statements is correct?

A values are more specific than attitudes
B attitudes are more positive than values
C values are less specific than attitudes
D attitudes are more negative than values
E I do not want to answer this question

24 Meglino's values schema consists of:

A empathy, helping and concern for others, honesty and fairness
B achievement, helping and concern for others, honesty and fairness
C empathy, achievement, honesty and fairness
D honesty, helping and concern for others, fairness, integrity
E I do not want to answer this question

25 Which of these statements is correct?

A cultural self-awareness is a pre-requisite for understanding other cultures
B cultural self-awareness is a hindrance to understanding other cultures
C cultural self-awareness was a term coined by Rotter
D cultural self-awareness was a term coined by Machiavelli
E I do not want to answer this question

26 Which of these statements is correct?

A culture shock does not involve a re-evaluation of core values
B culture shock necessarily involves re-evaluation of core values
C culture shock is experienced more by females than by males
D culture shock is experienced more by males than by females
E I do not want to answer this question

27 What is **not** part of the performance equation factors?

A attributes
B motivation
C work effort
D organizational support
E I do not want to answer this question

28 Which of these statements is correct?

A stereotypes are not always inaccurate
B stereotypes are always accurate
C stereotypes are always inaccurate
D stereotypes are always the result of culture shock
E I do not want to answer this question

29 The nomothetic (traits) approach to personality typically stresses the way of understanding personality that centres on two elements, traits and characteristics. Mark the right alternative presenting the two specific expressions of these two elements below:

A nomothetic and Canimethic
B psychometric and Charimetric
C nomothetic and Charimetric
D nomothetic and Psychometric
E I do not want to answer this question

30 Learning is:

A a relatively temporary change in behaviour resulting from experience
B not related to behaviour or experience
C a relatively permanent change in behaviour resulting from experience
D concerned with both permanent and temporary changes
E I do not want to answer this question

31 Which of the following is **not** included in general approaches to learning?

A social learning
B operant conditioning
C motivation learning
D cognitive learning
E I do not want to answer this question

32 Operant conditioning is illustrated by:

A Pavlov's dog salivating at the bell
B a department store manager congratulating employees for replacing product on demand
C a previous reaction when asked to step into the boss's office
D a person experiencing a sharp pain when seeing an electric prod after being tortured with one
E I do not want to answer this question

33 Positive reinforcement is a part of:

A cognitive learning
B operant conditioning
C classical conditioning
D social learning
E I do not want to answer this question

34 Social learning theory is achieved through reciprocal interactions among:

A people, behaviour and environment
B motivation, needs and performance
C knowledge and skill
D performance and human resource maintenance
E I do not want to answer this question

35 Kolb's learning theory is an example of:

A Social Learning Theory
B Classical Conditioning Theory
C Operant Conditioning Theory
D Experiential Learning Theory
E I do not want to answer this question

36 The use of operant conditioning to modify animal and human behaviour was popularized by:

A B. F. Skinner
B Abraham Maslow
C E. L. Thorndike
D Victor Vroom
E I do not want to answer this question

37 People acquiring new behaviours by directly observing and then imitating the behaviour of others is called:

A shaping
B positive reinforcement
C social learning
D cognitive conditioning
E I do not want to answer this question

38 Social learning theory is associated with the work of:

A Abraham Maslow
B B. F. Skinner
C E. L. Thorndike
D Albert Bandura
E I do not want to answer this question

39 Self-management strategies are related most closely to:

A social learning theory
B extinction
C negative reinforcement
D operant conditioning
E I do not want to answer this question

40 A worker being reprimanded for absenteeism is an example of which OB Mod strategy?

A extinction
B negative reinforcement
C punishment
D shaping
E I do not want to answer this question

41 Both positive and negative reinforcement attempt to:

A encourage a desirable behaviour
B reward excellent workers on a timely basis
C discourage an undesirable behaviour
D weaken a worker's desire for monetary rewards
E I do not want to answer this question

42 The more immediate the delivery of a reward after the occurrence of a desirable behaviour, the:

A greater the reinforcing effect on the behaviour
B less likely the reward will act as a positive reinforcer
C greater the need for extinction on the part of the organisation
D greater the capacity for negative reinforcement
E I do not want to answer this question

43 The creation of new behaviour by the positive reinforcement of successive approximations to the desired behaviour is known as:

A extinction
B shaping
C operant conditioning
D classical conditioning
E I do not want to answer this question

44 Withholding reinforcement for a behaviour that has previously been positively reinforced is known as:

A shaping
B classical conditioning
C extinction
D avoidance
E I do not want to answer this question

45 Ethical concerns about systematic use of punishment include that:

A it is always the innocent worker who is punished
B it is not effective at all in changing behaviour
C it is inequitably administered
D managers can abuse their power
E I do not want to answer this question

46 An approach avoidance conflict occurs when:

A a person tries to avoid a positive or negative consequence.
B a person must decide to do something that has both positive and negative consequences
C a person must decide between two negative consequences
D a person must decide between two positive consequences
E I do not want to answer this question

47 Strengthening of desirable behaviour comes from:

A positive and negative reinforcement
B positive reinforcement and extinction
C extinction and avoidance
D avoidance and punishment
E I do not want to answer this question

48 Single loop learning is concerned with:

A the understanding and reflecting upon experience
B innovation and creativity
C learning by rote, with an emphasis on memorisation rather than comprehension
D accessing, retrieving and capturing knowledge
E I do not want to answer this question

49 A continuous reinforcement schedule, as compared to an intermittent reinforcement schedule:

A is more durable
B is less costly
C is more costly
D is more disliked by subordinates
E I do not want to answer this question

50 When a worker meets his/her production quota to avoid nagging by the supervisor it is an example of:

A positive reinforcement
B negative reinforcement
C extinction
D punishment
E I do not want to answer this question

51 When a manager counsels an employee's co-workers to stop 'covering up' for the worker's lateness and poor performance, it is an application of:

A punishment
B negative reinforcement
C extinction
D shaping
E I do not want to answer this question

52 Lifelong learning can be defined as:

A The total experience that we have during our working careers
B The commitment that an organization shows to employee development and learning
C The adoption of a philosophy that we learn throughout our lives, and that learning does not cease when we reach a certain age
D The culmination of qualifications that we accrue over our lifetime
E I do not want to answer this question

53 Self-management behaviour strategies do not include:

A rehearsing and self-punishing
B self-setting goals and self-observing
C managing cues and self-rewarding
D establishing negative thought patterns and reduce self-efficacy
E I do not want to answer this question

54 Self-management strategies include:

A behavioural-focused and cognitive-focused strategies
B cognitive-focused strategies only
C behavioural-focused strategies only
D classical and cognitive focused strategies
E I do not want to answer this question

55 The “Law of effect” is most commonly associated with:

A B. F. Skinner
B Abraham Maslow
C E. L. Thorndike
D Victor Vroom
E I do not want to answer this question

56 Extinction is:

A The stopping of undesirable behaviour by punishment
B The withdrawal of the reinforcing consequences of behaviour
C When behaviour changes as a result of successive punishments
D The administration of negative consequences that lead to behavioural changes
E I do not want to answer this question

57 Intermittent reinforcement is:

A a reinforcement schedule that rewards behaviour only periodically
B a reinforcement schedule that administers a reward each time a desired behaviour occurs
C the creation of new behaviour by positive reinforcement
D reinforcement only after punishment is administered
E I do not want to answer this question

58 The difference between organizational learning and teaching organizations is:

A organizational learning is done by individuals whereas teaching organizations are those that teach all employees
B none
C teaching organizations aim to pass on learning to others to achieve and maintain success, whereas organizational learning is simply the sum of all learning in the organization
D teaching organizations aim to pass on learning to others to achieve and maintain success, whereas organizational learning explains the process of acquiring or developing knowledge that can change behaviour and improve performance
E I do not want to answer this question

59 Which of the following provides necessary preconditions for organizational learning?

A trust, commitment and organizational support
B trust, commitment and organizational change
C commitment, organizational change and individual learning
D trust, organizational support and individual learning
E I do not want to answer this question

60 According to Miles, radical change is:

A mission led, total-system based, and requires sustained organizational learning
B strategy led, total-system based, and requires sustained organizational learning
C vision led, total-system based, and requires sustained organizational learning
D goal led, requiring sustained organizational learning
E I do not want to answer this question
