EXAMINATION QUESTION PAPER - Multiple choice

EXC 29531
Organizational Behaviour and Management

Department of Leadership and Organizational Behaviour

Start date:	02.05.2018	Time 09.00
Finish date:	02.05.2018	Time 10.00

Weight:	Pass / Fail
Total no. of pages:	18 incl. front page
Answer sheets:	Answer sheets for multiple-choice examinations
Examination support materials permitted:	Bilingual dictionary

PLEASE READ THE FOLLOWING BEFORE YOU BEGIN!

- Students must themselves assure that the examination papers are complete.

- Students must provide the following information on the answer sheet:
  - ✓ **Examination code**
  - ✓ **Personal initials**
  - ✓ **ID-nr**

  The ID-nr must be recorded with both the appropriate numbers and by putting an "X" by the corresponding number in the columns below.

- Do not use pencils or pens with green ink when filling in answer sheets. Answer sheets must not be used for rough drafts.

- **All answers must be recorded with an "X" under the letter you believe corresponds with the correct answer.**

- **Cancel an "X" by filling in the box completely (boxes that are completely filled in will not be registered). "X" in two boxes for one question will be registered as a wrong answer.**

- The attached example shows you how the answer sheet would be filled in if A were the correct answer for question 1, B correct for question 2, C correct for question 3 and D correct for question 4. An "X" under E indicates that you choose not to answer question 5.

- **Your answers are to be recorded on the answer sheet. Answers written on the examination papers and not on the answer sheets will not be graded.**

- There is only <u>one</u> right answer for each question. Because the questions are weighted equally, it can be to your advantage to answer the easiest questions first.

- Wrong answers are given -1 point, unanswered questions get 0 points (indicated by an "X" next to E") and correct answers are given 3 points.

- You can keep the examination papers.

Dette svararket leses kun av en maskin. Ikke noe av det du skriver utenom de definerte feltene blir lest eller tatt hensyn til.
Ikke kluss på arket. Be heller om et nytt.

This answer sheet is only read by a machine. Answers or comments written on the examination paper or outside the boxes will not be graded.
Do not scribble on this sheet.
Please ask for a new answer sheet if you need one.

1 An individual's willingness to perform is directly related to their:

A needs, expectations, rewards

B needs, expectations, values

C expectations, values, effort

D expectations, competencies, needs

E I do not want to answer this question

2 Content motivation theories are represented by:

A Maslow, Alderfer, Herzberg and McClelland

B Maslow, Vroom, Alderfer and Herzberg

C Alderfer, McClelland, Vroom and Adams

D Maslow, Adams, Vroom and Alderfer

E I do not want to answer this question

3 The need level immediately preceding self-actualisation in Maslow’s hierarchy of needs theory is:

A social

B safety

C esteem

D security

E I do not want to answer this question

4 Maslow's theory:

A applies equally to all people

B is a content motivation theory

C is more a theory of leadership than of motivation

D is a process motivation theory

E I do not want to answer this question

5 Which of the following are considered higher-order needs?

A self-actualisation and social

B esteem and social

C esteem and self-actualisation

D self-actualisation and safety

E I do not want to answer this question

6 The need for love or affection or the sense of belongingness in one’s relationships is known as:

A self-actualisation

B safety

C social

D security

E I do not want to answer this question

7 One of the needs in Alderfer's theory is called:

A physiological

B growth

C self-actualisation

D security

E I do not want to answer this question

8 The theory of acquired needs that focus on power was developed by:

A Maslow

B Alderfer

C McClelland

D Vroom

E I do not want to answer this question

9 Alderfer's modification of Maslow’s theory puts the need levels into how many different categories?

A three

B four

C five

D six

E I do not want to answer this question

10 Which of the following relates to Alderfer's existence needs?

A material wellbeing

B continued personal development

C continued personal growth

D continued self-actualisation

E I do not want to answer this question

11 The three acquired needs in McClelland's theory are:

A achievement, affiliation, self-actualisation

B achievement, affiliation, power

C achievement, safety, power

D achievement, affiliation, security

E I do not want to answer this question

12 The three needs in Alderfer's modification of Maslow's theory are existence, relatedness and:

A achievement

B growth

C power

D affiliation

E I do not want to answer this question

13 Herzberg suggested that performance can be improved by:

A emphasising instrumentality

B stressing higher-order needs

C adding satisfiers to people’s jobs

D adding hygienes to people's jobs

E I do not want to answer this question

14 McClelland's need for achievement is characterised by a desire to:

A solve problems

B influence other people's behaviour

C be responsible for other people

D emphasise higher-order needs

E I do not want to answer this question

15 ERG theory is the work of:

A Maslow

B Herzberg

C Adams

D Alderfer

E I do not want to answer this question

16 In Alderfer's theory:

A only one need can be activated at one time

B more than one need can be activated at one time

C activated needs become rewards

D content and process theories are combined

E I do not want to answer this question

17 Herzberg's theory does not include:

A satisfiers

B hygiene factors

C equity

D job content factors

E I do not want to answer this question

18 Process theories:

A are thought to be static and descriptive

B lend insight into people’s needs

C are weakly linked with work efforts.

D provide an understanding of the thoughts that influence behaviour

E I do not want to answer this question

19 Victor Vroom:

A proposed a theory of hierarchy of needs

B developed a well-known version of expectancy theory

C refined Maslow’s theory

D refined equity theory

E I do not want to answer this question

20 The probability assigned by an individual that work effort will be followed by a given level of achieved task performance is:

A instrumentality

B expectancy

C deprivation

D valence

E I do not want to answer this question

21 The key terms in expectancy theory are:

A expectancy, instrumentality, valence

B instrumentality, equity, tension

C valence, desirability, instrumentality

D tension, valence, expectancy

E I do not want to answer this question

22 The meaning of pay from an equity theory perspective is that:

A pay is an object of social comparison

B pay is only one of many work valued rewards

C pay is one of the extrinsic rewards that a manager may use

D pay is one of the intrinsic rewards that a manager may use

E I do not want to answer this question

23 Herzberg's work:

A has been fully approved by OB experts

B led Maslow to develop his own theory

C is a form of process motivation theory

D is quite controversial

E I do not want to answer this question

24 Equity theory and expectancy theory:

A are both content theories

B are both extensions of Maslow

C each involve need satisfaction

D are both process theories

E I do not want to answer this question

25 Valence is defined by Vroom as the:

A value attached by an individual to various work outcomes

B given level of achieved task performance

C anticipation of negative inequities

D value attached by an individual to effort

E I do not want to answer this question

26 Extrinsic rewards:

A tend to be large in magnitude

B are similar to needs

C are expensive to administer

D are given to the individual by someone else

E I do not want to answer this question

27 The integrated motivational model:

A combines content and context motivation theories

B combines content and process motivation theories

C shows how rewards can lead to individual and group performance

D shows how contingencies can lead to individual and group performance

E I do not want to answer this question

28 Which of the following is **not** a strategy or technique for empowering employees?

A provide emotional support

B encourage job mastery

C provide appropriate feedback

D surrender all power

E I do not want to answer this question

29 A person's belief that he or she can perform adequately in a situation is called:

A self-efficacy

B empowerment

C motivation

D competency building

E I do not want to answer this question

30 To work well, merit pay plans should:

A be dependent on cost-of-living adjustments

B be based on group incentives

C make pay contingent on satisfaction

D be based on accurate measure of individual performance

E I do not want to answer this question

31 Intrinsic work rewards:

A result directly from task accomplishment

B result directly from pay

C are controlled externally by supervisors

D are controlled by co-workers

E I do not want to answer this question

32 Job enrichment is inspired by which of the following theories?

A Maslow’s theory of hierarchy of needs

B McClelland’s achievement motivation theory

C Herzberg’s two-factor theory

D scientific management

E I do not want to answer this question

33 Job simplification is characterised by:

A de-skilling work

B an increase in meaningfulness of work

C an increase in satisfaction

D reducing monotony and boredom

E I do not want to answer this question

34 Simplified job designs:

A are highly specialised, with repetitive performance of a narrow set of tasks

B periodically shift workers among jobs involving different tasks

C involve building motivating factors into job content

D emphasise vertical loading of job tasks

E I do not want to answer this question

35 Frederick Herzberg's two-factor theory suggests more use of job:

A enrichment

B rotation

C de-skilling

D specialisation

E I do not want to answer this question

36 Job simplification:

A increases task specialisation

B increases task variety

C shifts workers among jobs involving different tasks

D builds in motivators

E I do not want to answer this question

37 Increasing the variety of tasks performed by a worker is called:

A job simplification

B job rotation

C scientific management

D job specialisation

E I do not want to answer this question

38 What is the periodic shifting of workers from one job to another?

A job enlargement

B job rotation

C job enrichment

D job simplification

E I do not want to answer this question

39 The practice of building motivating factors into job content is known as:

A job simplification

B job moderators

C horizontal loading

D job enrichment

E I do not want to answer this question

40 Vertical loading is defined as:

A increasing task variety by combining several jobs into one

B shifting workers to new and more challenging positions

C expanding job content by adding tasks previously performed by supervisors

D increasing task specialisation

E I do not want to answer this question

41 Which of the following is one of the core elements in the Job Characteristics Model of job enrichment?

A task significance

B affiliation

C task specialisation

D power

E I do not want to answer this question

42 Who developed a diagnostic approach to job enrichment based on five core job characteristics?

A Hackman and Oldham

B Herzberg

C Skinner and Thorndike

D Mintzberg

E I do not want to answer this question

43 Who specified a goal-setting theory for improving work performance?

A Evelyn Tweedy

B Edward Lawler

C Edwin Locke

D David McClelland

E I do not want to answer this question

44 In goal-setting theory:

A difficult goals lead to lower performance than easy ones

B specific goals lead to lower performance than general ones

C difficult goals lead to higher performance than easy ones

D goal acceptance is irrelevant

E I do not want to answer this question

45 Goal-setting theory is based on:

A expectancy theory

B equity theory

C a modified version of Maslow's theory

D Herzberg's theory

E I do not want to answer this question

46 Goal-setting theory:

A is related to MBO

B has nothing to do with MBO

C is related to Organisational Behaviour Modification (OB Mod)

D is related to achievement motivation theory

E I do not want to answer this question

47 Joint decision making by superior and subordinate in MBO is called:

A commitment

B expectancy

C means–end chains

D goal setting

E I do not want to answer this question

48 The essence of Management by Objectives (MBO) is:

A joint goal setting between two subordinates

B joint goal setting between a manager and a subordinate

C the application of Herzberg's motivation theory

D the application of Maslow's motivation theory

E I do not want to answer this question

49 When the compressed work week is first implemented:

A negative effects seem to occur

B results are hard to interpret one way or the other

C positive effects seem to occur

D there is high worker turnover

E I do not want to answer this question

50 What is the process of developing, negotiating and formalising the task objectives that an employee is responsible for accomplishing?

A job enrichment

B job design

C goal setting

D goal availability

E I do not want to answer this question

51 Task goals are expected to lead to higher performance when:

A self-efficacy is low

B they are specific

C they are arbitrarily set by the supervisor

D there are many of them

E I do not want to answer this question

52 The compressed work week is more effective if accompanied by:

A job simplification

B increased job specialisation

C job enrichment

D change in job design

E I do not want to answer this question

53 Flexitime:

A increases individual autonomy in the work schedule

B is rapidly replacing more traditional schedules

C has positive effects at first and then negative ones

D is especially popular among makers of motor vehicles

E I do not want to answer this question

54 Job sharing:

A is being used by a majority of employers

B is especially common among supervisors

C may require a high degree of co-ordination

D has extremely positive effects on productivity

E I do not want to answer this question

55 The benefits associated with compressed work week plans include:

A less total time spent on the job

B lower commuting costs

C higher absenteeism

D less fatigue

E I do not want to answer this question

56 Two alternative work arrangements are:

A part-time work, job enrichment

B job sharing, job rotation

C job rotation, compressed work week

D compressed work week, flexitime

E I do not want to answer this question

57 Which of the following disadvantages is **most** likely to be encountered with flexitime?

A lower job satisfaction

B higher worker performance

C potential problems with scheduling

D reduced turnover

E I do not want to answer this question

58 When one full-time job is assigned to two persons who divide the work, it is called:

A job rotation

B job enrichment

C job sharing

D the compressed work week

E I do not want to answer this question

59 An annualized scheme:

A is a situation in which an employee is classified as temporary

B is a scheme whereby workers weekly hours are calculated on an annual basis

C is a situation in which an employee works only at Christmas

D is a scheme whereby workers are getting payed once a year

E I do not want to answer this question

60 An advantage of working in a ‘virtual office’ is:

A it is the sole focal point of employee activity

B workers are in close proximity

C workers can work in a variety of locations

D it is easy to control others

E I do not want to answer this question
